BeginRepeat Sample

Table Example

This is an example of using a BeginRepeat Tag and an EndRepeat Tag with a table of data. This will loop through the Employees in the data source and display the info for each employee.

Employee ID	First Name	Last Name	City	Hire Date
5	Steven	Buchanan	London	10/17/1993
8	Laura	Callahan	Seattle	3/5/1994
1	Nancy	Davolio	Seattle	5/1/1992
9	Anne	Dodsworth	London	11/15/1994
2	Andrew	Fuller	Tacoma	8/14/1992
7	Robert	King	London	1/2/1994
3	Janet	Leverling	Kirkland	4/1/1992
4	Margaret	Peacock	Redmond	5/3/1993
6	Michael	Suyama	London	10/17/1993

Text Example

This is an example of using a BeginRepeat Tag with plain text instead of a table. This example will demonstrate showing information of all orders in the data source. We will limit the number of orders to 7 using the BeginRepeat property *end*.

Order ID: 10248
